

It's time to be a better you

The News Digest can help you to transform a sea of information into a tide of opportunity. Your personalized, AI-curated briefing of news and information, incorporating exclusive content from Reuters and other major global sources, is delivered how you want it, when you want it.

Reasons why News Digest should be your go-to for news alerts:

1

Personalized content curation

Benefit from LSEG Intelligent Tagging, which identifies petabytes of data, so you can personalize and filter highly specific news you want, in order to spot new opportunities.

2

All signal, no noise

A combination of advanced and proprietary AI algorithms, such as significance, Top News and Most Read, duplication and clustering, are applied to ensure you only receive information that's of interest to you.

3

Stay ahead of changing trends

The stories most relevant to you are selected using AI-driven concepts such as news significance, as well as other signals such as Reuters editorial curation and readership data to build a relevant and impactful Digest.

4

Exclusive access to Reuters news

Get exclusive access to Reuters and 10,000+ other global news sources for agenda setting insight. Utilize Reuters Breakingviews for reactions as they develop, providing genuine financial insight and provoking fresh ideas in near real-time – faster than mainstream media.

5

Tailored, actionable insights

Using a unique combination of AI and editorial curation tags, we can pick the most critical information most relevant to you, saving you time and ensuring you never miss a beat.

6

Scan, skim or dive deep

Scan the news headlines, skim through the short summaries or dive right into the full story in one click – it's your choice.

7

Configurable in minutes

Follow a few quick steps in Eikon and Workspace to configure as many Digests as you desire. With access to all the world's relevant news and data, there's no end to the possibilities.

8

Real-time or snapshot

The Digest is updated in real time within Eikon and Workspace or as a scheduled snapshot in time when delivered by email.

9

Cross-platform accessibility
