

LSEG Connected Markets

Connecting local economies to global opportunity

LSEG

Overview

In a financial world driven by global collaboration, forming partnerships is essential for your local economy, communities and wider global economic growth. Whether you are looking to digitalise your central bank, build financial market infrastructure, expand your economy into the global market, empower your industry or embark on the journey of transitioning to net zero – we are here to understand you and support your path of growth. LSEG Connected Markets is your dedicated and agile team focused on connecting you to a world of financial opportunities.

To help create lasting and impactful partnerships, we leverage our unique position in the world of finance and a range of products, services and thought leadership to meet to your unique needs. Our historic, systemic and leading position in the world of finance delivers market infrastructure, data, content and workflow solutions for all.

Through our trusted and world-renowned suite of brands, the LSEG ecosystem offers seamless access to global financial markets, across the full trade lifecycle. Generating flexible and adaptable solutions engineered for your specific regulatory environment and community, LSEG Connected Markets creates new channels to help surface financial opportunities that can flow seamlessly across borders, affording emerging and frontier markets greater connection to the global economy.

The importance of our local expertise in understanding the unique challenges of your economy is core to how we break down siloes, work with nuanced regulations and meet compliance. Our local teams span four continents, giving us the ability to tailor each solution to your specific country, delivering stable and sustainable growth.

Welcome to LSEG, the home of connecting economies and unlocking financial opportunity for over 200 years.

At a glance

We connect economies across the world by opening financial possibility for everyone through data and insights, infrastructure and workflow solutions. As a leader in global markets, we drive financial stability, empower economies and enable customers to create sustainable growth.

Emerging markets ecosystem

More than 100 central banks in emerging markets rely on our services to run their local markets.

Home of 'alternative investments'

We provide key solutions for growing alternative investment areas, including environmental, social and governance (ESG), Islamic finance, infrastructure, carbon, and growth economies such as China, India and Japan.

Global footprint

Our team spans four continents, with more than 7,000 employees in approximately 40 locations, bringing a truly global mix of expertise from diverse markets, backgrounds and sectors.

Connectivity

Countries, banks and business are looking for a partner to help them connect to global financial market infrastructure and economies. We offer tailored connectivity solutions based on existing central bank and financial market ecosystem nuances and extensive market infrastructure and risk intelligence capabilities to help emerging and frontier markets develop stability and risk mitigation.

Our range of workflow solutions allows you to connect locally and to the global economy.

Trade capabilities

- **Auctions** – end-to-end management of the auction process for central banks to announce, manage and perform instantaneous auctions (including Shariah-compliant deposit auctions) electronically, with access for all parties via a single application
- **Advanced Dealing** – a robust trade execution and trade capture tool that streamlines manual processes and reduces risk for efficient workflow around deposits trading
- **Matching** – access to primary markets for FX spot and FX swap trading, with anonymous central limit order books predicated on bilateral credit relationships within the venue, allowing firm prices for a high certainty of execution
- **Trade Notification** – a high-speed messaging hub to securely managing trade notification requirements across a range of trade types and asset classes for financial participants around the world

Connecting investors with investments

- **Infrastructure solutions** – data transparency remains a key obstacle to growth in private sector funding and access to standardised, trusted and transparent data is key. We use the world's most comprehensive view of infrastructure and project finance-related insight to help you analyse trends in infrastructure investment, manage risks associated with infrastructure, monitor progress across multiple projects, understand relationships between various stakeholders, build and deploy investable assets and leverage precedent and ongoing transactions for due diligence, structuring and valuation
- **Islamic finance** – knowledge solutions and bespoke services for government entities, multilateral organisations and leading financial institutions to support investors in fulfilling their aspirations and executing their strategies in the Islamic markets space, including the delivery of data, insights, research, consulting services and market connectivity

Data and analytics

Emerging and frontier markets need domestic content and insights related to global themes, including ESG, sustainability, renewables and more. We offer a hub of information and core content with insights, commentary and research to help our customers make more informed decisions.

- **Core content** – including fixed income, cross-asset, equities, cross-market, foreign exchange (FX), money interest derivatives, trade reporting, infrastructure projects and commodities

- **ESG and sustainability** – the data you need to integrate ESG and climate-related factors into investment workflows, including portfolio analysis, equity and fixed income research, screening and quantitative analysis. The unique focus on sovereign data allows you to link country economic performance and ESG through exclusive models
- **Key news partners** – our partnerships with Zawya and Reuters give you access to leading, trusted business and finance news for enhanced decision making

Local expertise

Our team are on the ground to help solve complex local challenges, leveraging the entire LSEG ecosystem. Our global presence of more than 7,000 employees in around 40 locations across four continents means we understand the unique challenges specific to regions, countries and businesses.

- Navigate effectively through risks and opportunities in growth economies including China, Japan, India and Latin America
- Content and platforms in key local language markets
- Data from over 140,000 global sources for breadth and depth of insight

About LSEG

LSEG (London Stock Exchange Group) is more than a diversified global financial markets infrastructure and data business. We are dedicated, open-access partners with a commitment to excellence in delivering the services our customers expect from us.
