

DataScope Warehouse

Cloud-based, ready-to-use enterprise data for today's global markets

Overview

Step into a universe of unmatched data accessibility with DataScope Warehouse – LSEG's latest cutting-edge delivery solution, meeting you in the cloud with access to LSEG's rich array of cross-asset pricing and reference data.

Access a data universe of possibilities in the cloud

Unlock unparalleled market insights with DataScope Warehouse, granting you total and immediate access to LSEG's complete database of record for fixed income and equity data.

Fixed income

Our historical fixed income database, spanning securities issuances dating back to the 1970s, ensures you have the most accurate and extensive financial information at your fingertips. Coverage includes:

- 9.3+ million global government and agency bonds (954,000 live)
- 4.4+ million US municipal securities (1 million live)
- 2.7+ million mortgage pools (1.2+ million live & priced)
- 1+ million structured products
- 480k+ bank loans

Equity Data

Our global equity data encompasses over 1.5 million securities from more than 180 exchanges worldwide. With our advanced technological infrastructure, we ensure swift and efficient data collection. Our extensive repository of reference data grants you easy access to all the essential information, empowering you to make the most optimal decisions. Coverage includes:

- 700k+ equities (stocks, ADRs and GDRs)
- 39+ million warrants
- 650k+ indices and statistics
- 170k+ funds
- 8+ million entities

Freedom to choose your data, your way

DataScope Warehouse is cloud collaborative¹ so whichever cloud provider you decide to partner with, you won't be compromising on data access and with multiple file formats available to choose from you'll be spending less time data wrangling and more time focusing on what matters most – discovering insights and boosting productivity.

Flexible commercial model

Eliminate complex installations and maintenance and enjoy the ability to access and consume as much data as you need, exactly when you need it. By moving away from physical on-premise data centres, you can streamline operations and redirect your resources towards financial application development, big data analysis and enhancing your innovation and technology strategies. All this while significantly lowering your total cost of ownership.

Partner with LSEG Customer Consulting for seamless on-boarding

We understand transformation journeys like this can be daunting, time consuming and costly. That's why we created LSEG Customer Consulting, so you get expert and tailored guidance throughout the project – from ideation all the way through to implementation. Our tailored consulting services cover our entire DataScope suite of solutions, including DataScope Warehouse, Data & Workflow Implementation and Advanced Solution Kit Adaptor. So, no matter how complex your project, we're on hand to give you the personalised and tailored support you need to get your project across the finish line.

Reach out to our sales teams to explore how [DataScope Warehouse](#) can open a data universe of possibilities for you and your business.

¹ DataScope Warehouse is currently delivered via Snowflake cloud infrastructure with more cloud providers scheduled to be rolled out through 2024.
