

## Performance Insights

## MONTHLY REPORT | JULY 2024

# Equity advance slows. Long-duration assets continue to struggle.

Markets digest sustained uncertainty from rate cut timing and election outcomes in major developed and emerging economies.

#### Global Asset Classes - Monetary outlook & Al optimism are still key drivers

The equity advance in Q2 was slower than in Q1 and more volatile, with a pullback in April and a rebound in May. Long-dated government and corporate bond segments continued to struggle in most regions. The broad commodity index gained. Oil posted a modest loss after Q1's strong showing. The US dollar's performance was mixed over the guarter.

### Global Equities – Emerging & US large-caps shine

The Emerging index and US large-caps outperformed the FTSE All-World and peers. The UK, Japan, Asia Pacific, Europe and US small-caps lagged the global benchmark in that order.

#### Industry returns - Technology & Financials lead, Real Estate lags

On average, Technology & Financials led industry returns, while Real Estate lagged the most with monetary policy still restrictive in most regions.

#### Alternative Indices – REITs & Infrastructure underperform

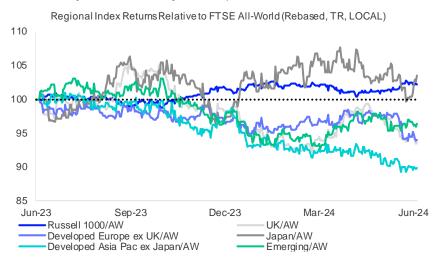

REITs and Core infrastructure underperformed globally. FTSE4Good outperformed in all but Developed Asia. Environmental Opportunities posted mixed results for Q2.

#### Factor performance - Size lags

(Small) Size broadly underperformed in Q2 and YTD, indicating the risk rally was mostly driven by large stocks. Momentum outperformed in 4 out of 6 regions in Q2.

#### Foreign exchange - USD's performance is mixed

The USD weakened modestly versus the British pound but strengthened versus the yuan, euro and yen over Q2. The yen's steep losses versus the USD continued.

#### Macro and Market Overview — Q2 2024

Uncertainty over the timing of monetary policy easing and election outcomes in major developed and emerging economies moved global markets in Q2 2024.

Growth divergence continued in Q2, but with US growth softening and some non-US economies playing catchup. The US's Q1 GDP was revised down from 1.6% to 1.4%. The UK and Eurozone returned to growth in Q1 from a technical recession. Japan slowed to a contraction in Q1 from the previous quarter.

Lower April and May inflation readings provided relief to US markets and policymakers after stubborn Q1 inflation. Disinflation continued in the UK, although markets remained concerned about the services component. The US and UK central banks held policy rates.

While Canada and the Eurozone made their first policy rate cut after the latest hiking cycle, expectations are not for quick subsequent cuts as inflation in both jurisdictions ticked up in May after declining in April.

In Japan, given the yen's historic weakness (breaching 160 yen/dollar), there is speculation about a possible rate hike to support the yen alongside other measures. CPI in

The US large-cap index extended its 12M lead relative to global peers in Q2.

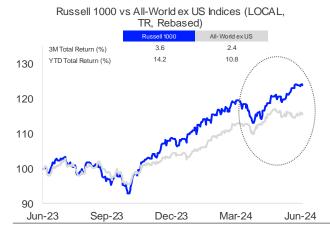

Japan remained above target. In China, the central bank balanced supporting the yuan with stimulating the economy and inflation. China's CPI crept back up to 0.3% YoY after hovering closer to zero in Q1.

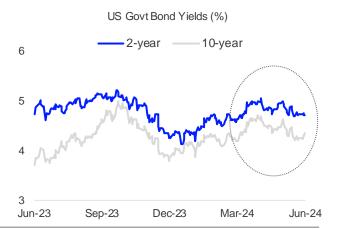

Government 10-year yields in the US, UK and Germany were bumpy during the quarter and slightly higher at quarter-end. Long yields rose in Japan after the relaxing of yield curve controls and were slightly lower in China QoQ.

Markets dealt with uncertainty from scheduled elections in South Africa, Mexico and India, where the outcomes were in line with expectations. However, others were unanticipated, such as the timing of the UK general elections in early July and parliamentary elections in France at the same time with a highly uncertain outcome.

Given this macro and geopolitical backdrop, it was a volatile quarter for equities, with a pullback in April, a rebound in May and more moderation in June. Still, equities were broadly up in Q2. Long-duration bonds continued to struggle in both government and corporate segments. Oil posted a modest loss after Q1's strong showing. The US dollar's performance was mixed.

The US 2-year and 10-year yields rose by 10 and 15 bps, respectively, in Q2.

Important notes: GDP: QoQ GDP growth rates are annualized. Japan's poll GDP growth is for FY 2024 ending March 2025. Composite PMI: June PMI are flash composite PMI, except for Japan which is flash manufacturing PMI. May PMI are final composite PMI, except for Canada and Japan which are final manufacturing PMI.

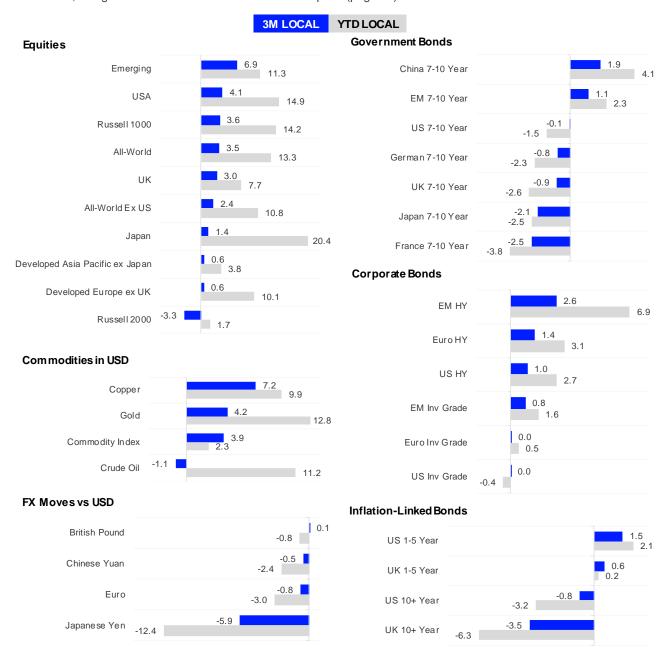

## Asset Class Returns – 3M & YTD (LC, TR %)

Equities continued to advance in Q2, albeit at a slower pace than in Q1. The Emerging index led equity market returns followed by US large-caps, both of which outperformed the FTSE All-World and peers. The UK, Japan, Asia Pacific, Europe and US small-caps lagged the global index in that order. YTD, Japanese equities still held the lead, while Asia Pacific equities lagged the most among the major regions (page 4).

Chinese and EM government 7-10 year bonds bested their developed market cohorts. French and Japanese 7-10 year bonds lagged the most given the political uncertainty in France and the historic rise in Japanese long yields. EM, Eurozone and US high yield outperformed their investment grade counterparts as duration continued to be challenged. Similarly, short-dated US and UK inflation-linked bonds outperformed their longer-dated (10yr+) counterparts, consistent with YTD trends.

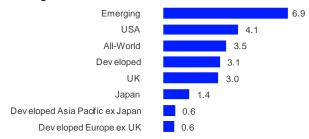

After Q1's strong showing, oil experienced a volatile quarter and posted a modest loss in Q2. The broader FTSE Commodity index posted gains. Copper and gold continued to rally.

The US dollar weakened slightly versus the British pound over the quarter but strengthened versus other major currencies such as the yuan, euro and yen. The yen posted steep losses versus the dollar over both 3M & YTD timeframes, alongside the Brazilian real and the Mexican peso (page 10).

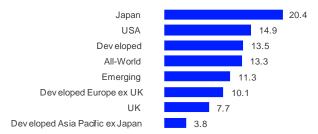

## Global Equity Market Returns – 3M & YTD (LC, TR %)

#### FTSE Regions 3M LOCAL

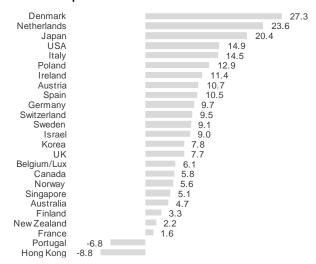

#### **FTSE Regions YTDLOCAL**

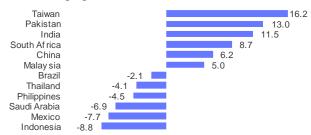

#### FTSE Developed 3M LOCAL

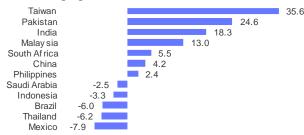

#### FTSE Developed YTD LOCAL

#### FTSE Emerging 3M LOCAL

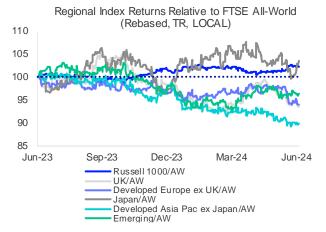

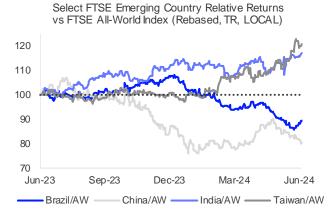

FTSE Emerging YTD LOCAL

US large caps and Japan continued to beat the global index over 12M, while Asia Pacific lagged the most.

Over 12M, both Taiwan and Indian equities performed better than the global index to buoy Emerging's returns.

## Regional Industry-Weighted Contributions to Returns – 3M (LC, TR %)

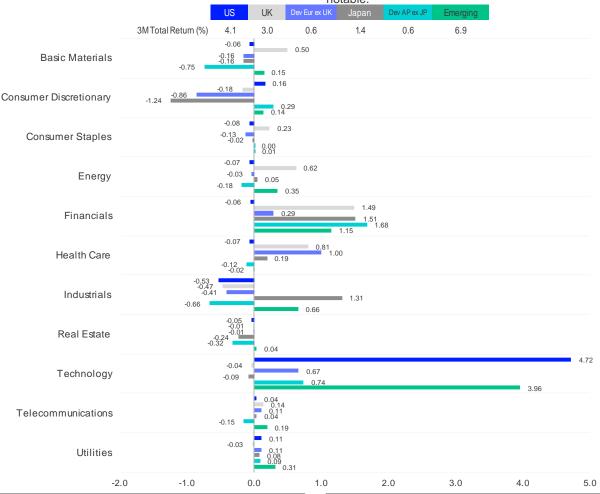

Industry contributions were mixed in Q2.

Tech contributed the bulk of returns in the top-performing Emerging index & the US, and to a lesser extent in Europe & Asia Pacific given their lower tech exposures.

Financials made solid contributions across major regions, except in the US where it detracted modestly. Utilities contributed in 5 out of 6 regions with the electricity

sector potentially benefitting from higher AI-related computing needs.

At the other end of the return distribution, real estate continued to struggle except in the Emerging index. Industrials detracted in 4 out of 6 regions, while solidly contributing in the other two. And discretionary's negative contribution to European and Japanese equity returns was notable.

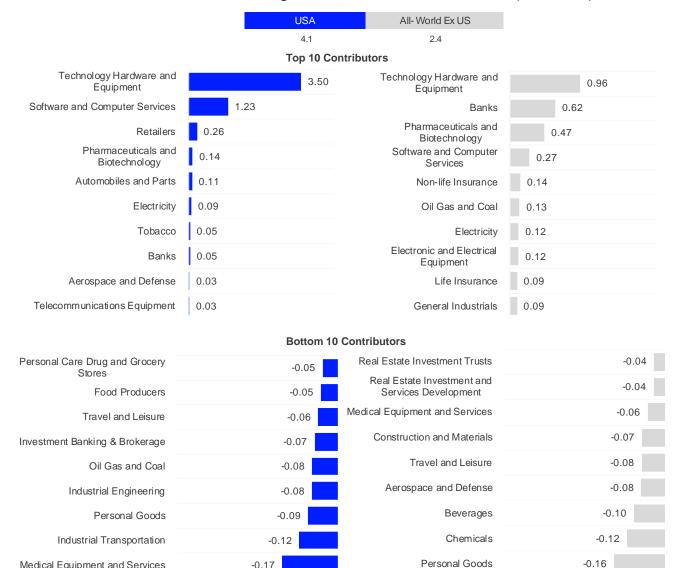

On average, tech & financials topped industry performance, while real estate lagged the most.

Tech is the largest in the US & Emerging; financials in the UK & Asia Pacific; industrials in Europe & Japan.

#### **ABOUT FTSE RUSSELL**

FTSE Russell is a leading global provider of index and benchmark solutions, spanning diverse asset classes and investment objectives. As a trusted investment partner we help investors make better-informed investment decisions, manage risk, and seize opportunities. Market participants look to us for our expertise in developing and managing global index solutions across asset classes. Asset owners, asset managers, ETF providers and investment banks choose FTSE Russell solutions to benchmark their investment performance and create investment funds, ETFs, structured products, and index-based derivatives. Our clients use our solutions for asset allocation, investment strategy analysis and risk management, and value us for our robust governance process and operational integrity. For over 35 years we have been at the forefront of driving change for the investor, always innovating to shape the next generation of benchmarks and investment solutions that open up new opportunities for the global investment community.

FTSE Russell® is a trading name of FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB and BR. "FTSE®", "Russell®", "FTSE Russell®", "FTSE4Good®", "ICB®", "The Yield Book®", "Beyond Ratings®" and all other trademarks and service marks used herein (whether registered or unregistered) are trademarks and/or service marks owned or licensed by the applicable member of LSEG or their respective licensors and are owned, or used under licence, by FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB or BR. FTSE International Limited is authorised and regulated by the Financial Conduct Authority as a benchmark administrator.

All information is provided for information purposes only. All information and data contained in this publication is obtained by LSEG, from sources believed by it to be accurate and reliable. Because of the possibility of human and mechanical error as well as other factors, however, such information and data is provided "as is" without warranty of any kind. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any claim, prediction, warranty or representation whatsoever, expressly or impliedly, either as to the accuracy, timeliness, completeness, merchantability of any information or of results to be obtained from the use of FTSE Russell products, including but not limited to indexes, data and analytics, or the fitness or suitability of the FTSE Russell products for any particular purpose to which they might be put. Any representation of historical data accessible through FTSE Russell products is provided for information purposes only and is not a reliable indicator of future performance.

No responsibility or liability can be accepted by any member of LSEG nor their respective directors, officers, employees, partners or licensors for (a) any loss or damage in whole or in part caused by, resulting from, or relating to any error (negligent or otherwise) or other circumstance involved in procuring, collecting, compiling, interpreting, analysing, editing, transcribing, transmitting, communicating or delivering any such information or data or from use of this document or links to this document or (b) any direct, indirect, special, consequential or incidental damages whatsoever, even if any member of LSEG is advised in advance of the possibility of such damages, resulting from the use of, or inability to use, such information.

No member of LSEG nor their respective directors, officers, employees, partners or licensors provide investment advice and nothing in this document should be taken as constituting financial or investment advice. No member of LSEG nor their respective directors, officers, employees, partners or licensors make any representation regarding the advisability of investing in any asset or whether such investment creates any legal or compliance risks for the investor. A decision to invest in any such asset should not be made in reliance on any information herein. Indexes cannot be invested in directly. Inclusion of an asset in an index is not a recommendation to buy, sell or hold that asset nor confirmation that any particular investor may lawfully buy, sell or hold the asset or an index containing the asset. The general information contained in this publication should not be acted upon without obtaining specific legal, tax, and investment advice from a licensed professional.

Past performance is no guarantee of future results. Charts and graphs are provided for illustrative purposes only. Index returns shown may not represent the results of the actual trading of investable assets. Certain returns shown may reflect back-tested performance. All performance presented prior to the index inception date is back-tested performance. Back-tested performance is not actual performance but is hypothetical. The back-test calculations are based on the same methodology that was in effect when the index was officially launched. However, back-tested data may reflect the application of the index methodology with the benefit of hindsight, and the historic calculations of an index may change from month to month based on revisions to the underlying economic data used in the calculation of the index.

This document may contain forward-looking assessments. These are based upon a number of assumptions concerning future conditions that ultimately may prove to be inaccurate. Such forward-looking assessments are subject to risks and uncertainties and may be affected by various factors that may cause actual results to differ materially. No member of LSEG nor their licensors assume any duty to and do not undertake to update forward-looking assessments.

No part of this information may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the applicable member of LSEG. Use and distribution of LSEG data requires a licence from FTSE, Russell, FTSE Canada, FTSE FI, FTSE FI Europe, YB, BR and/or their respective licensors.

The information contained in this report should not be considered "research" as defined in recital 28 of the Commission Delegated Directive (EU) 2017/593 of 7 April 2016 supplementing Directive 2014/65/EU of the European Parliament and of the Council ("MiFID II") and is provided for no fee.
